LOXLEY LOAD TEAM · OPERATIONS

LOX LOAD DASH Illustrated User Guide

Every app on app.loxload.com, shown with real screenshots and numbered labels

How to read this guide

1. Each screenshot has **numbered yellow markers** placed on the buttons, fields and indicators in the app.
2. The list next to each screenshot explains what each numbered item is for, in the same order.
3. The step lists under the screenshots walk through the common jobs from start to finish.

The screenshots were taken from the live apps on October 29, 2026, at phone width. On a tablet or PC the layout is wider, but the controls are the same. Screens that show sample entries (store codes, a test pallet, calculator numbers) are examples, not saved records.

Loxley Distribution Center · Loxley, AL

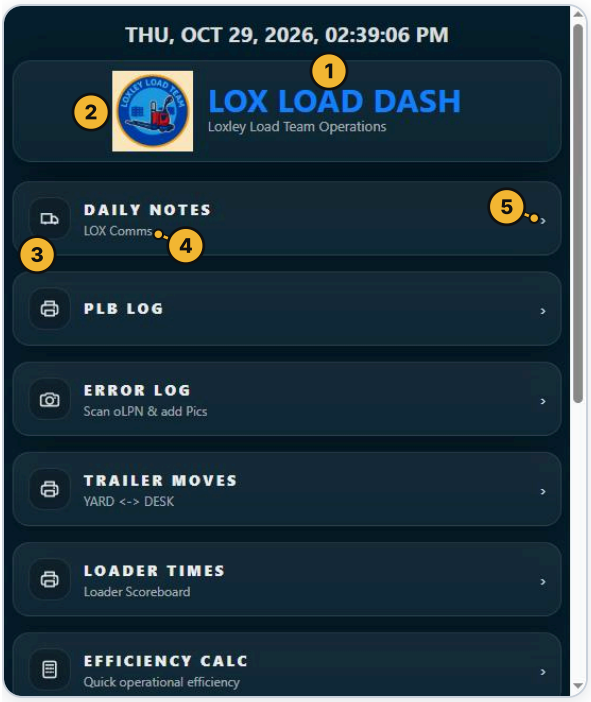

Version: October 29, 2026

START HERE

LOX LOAD DASH

OPEN
app.loxload.com

The home screen for the Load Team. It shows the date and time and has one tile for each app. Tap a tile to open that app.

LOX LOAD DASH home screen

1. Today's date and live clock
2. Loxley Load Team logo and app title
3. Each tile opens one app. The icon shows its type
4. Short description of the app under its name
5. Tap anywhere on the tile to open the app

11 · Store Map
map.loxload.com

Appendix
Codes, a typical day, troubleshooting

Things that work the same in every app

- **Shared and live.** Most apps sync with the server, so every phone, tablet and PC sees the same data. A badge such as `Live`, `Ready` or `Live Sync Online` means you're connected.

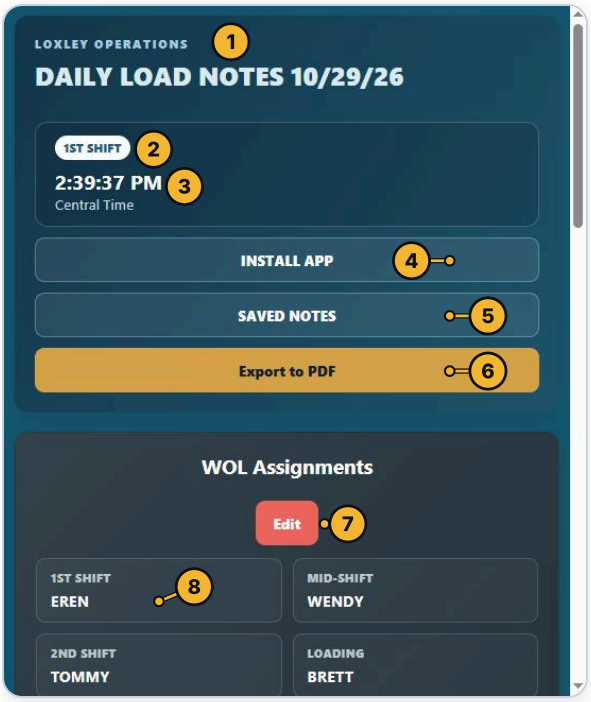

- **Install as an app.** Where you see `Install App`, tap it (or use "Add to Home Screen") to open the app full-screen from your home screen.
- **Scanning oLPNs.** A `Scan` button reads the pallet label with the camera. This works best in Chrome on Android. You can also use a hardware scanner or type the number. The apps remove the `(00)` prefix and keep the 18-digit oLPN.
- **Zones:** `AMB` Ambient · `CHL` Chiller · `DP` Dry Produce · `FRZ` Freezer · `BRD` Bread.
- **Deleting is permanent.** No app has a recycle bin, and the PLB Log deletes with one tap.

APP 1 · DAILY NOTES

Load Desk Daily Notes

OPEN
comms.loxload.com

The shared notebook for the day. Each note gets a permanent timestamp, the shift, your name and up to 4 photos. Each day has its own page, and past days are kept in Saved Notes.

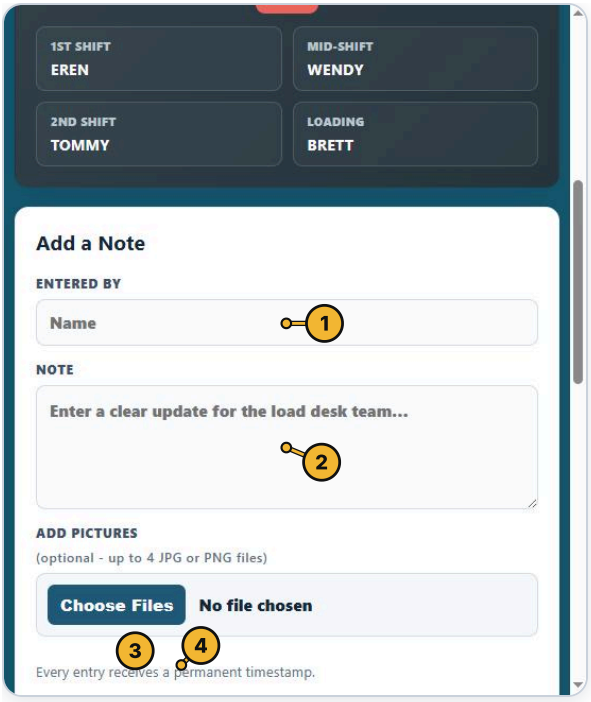

Daily Notes: header and WOL Assignments

1. Today's notes page. Each day gets its own page
2. Current shift: 1st shift until 3:30 PM, then 2nd shift
3. Live Central Time clock
4. Install the app on your home screen
5. Saved Notes: archive of past days, with a PDF for each
6. Export to PDF downloads today's notes
7. Edit the WOL names for the day
8. Who is WOL on each shift and on Loading

Set the WOL Assignments at the start of the day

1. If any assignment is blank, the app asks for them when it opens. You can also tap `Edit` on the WOL Assignments card.
2. Enter **1st Shift Load Desk WOL**, **Mid-Shift**, **2nd Shift Load Desk WOL** and **Loading WOL**, then tap `Save Assignments`.

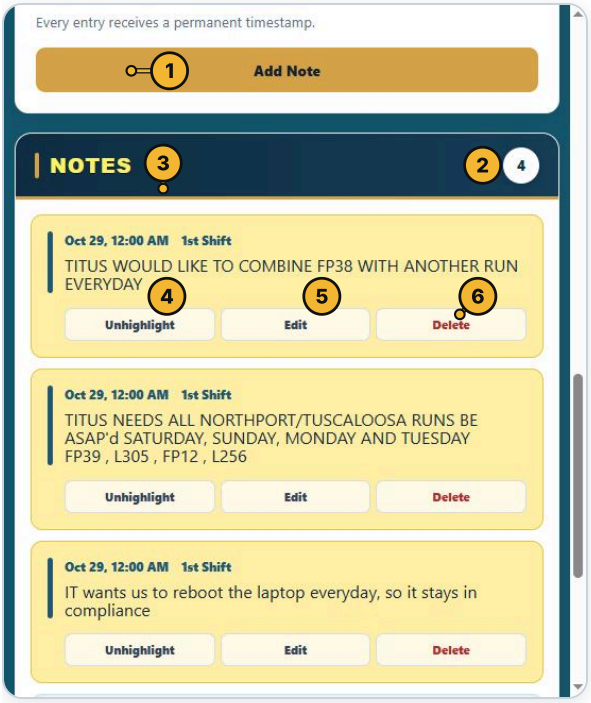

Daily Notes: Add a Note form

1. Entered by: your name
2. Note: type the update for the load desk team
3. Add up to 4 photos (JPG or PNG)
4. Every note is stamped with the date, time and shift

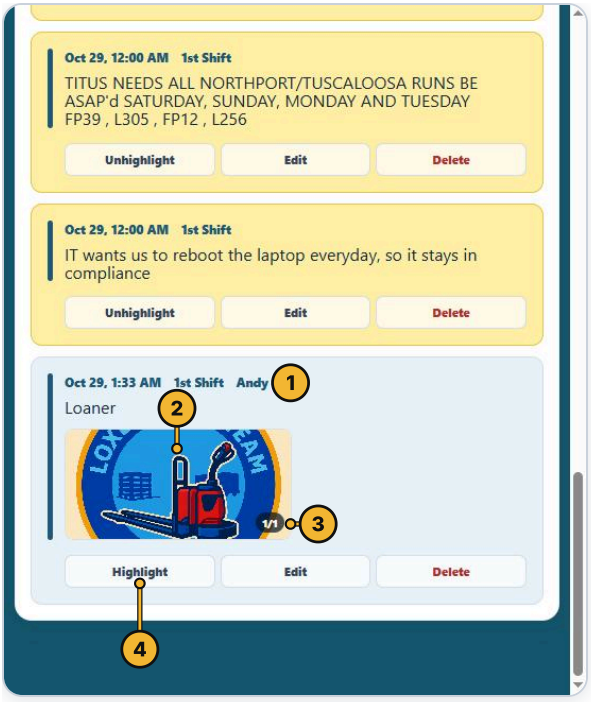

Add a note

1. Type your name in **Entered by** and write the **Note**.
2. Optional: tap **Choose Files** to attach up to 4 photos.
3. Tap `Add Note`. The note is stamped with the date, time and shift.

Daily Notes: saving and managing notes

1. Add Note saves your note to today's page
2. Number of notes today
3. Date, time and shift stamp
4. Highlighted notes turn yellow. Tap to highlight or unhighlight
5. Edit the text, name or photos
6. Delete asks first and cannot be undone

Daily Notes: a normal note with a photo

1. Name of the person who entered the note
2. Attached photo. Tap it to view full size
3. Photo count, for example 1 of 1
4. Not highlighted yet

TIP

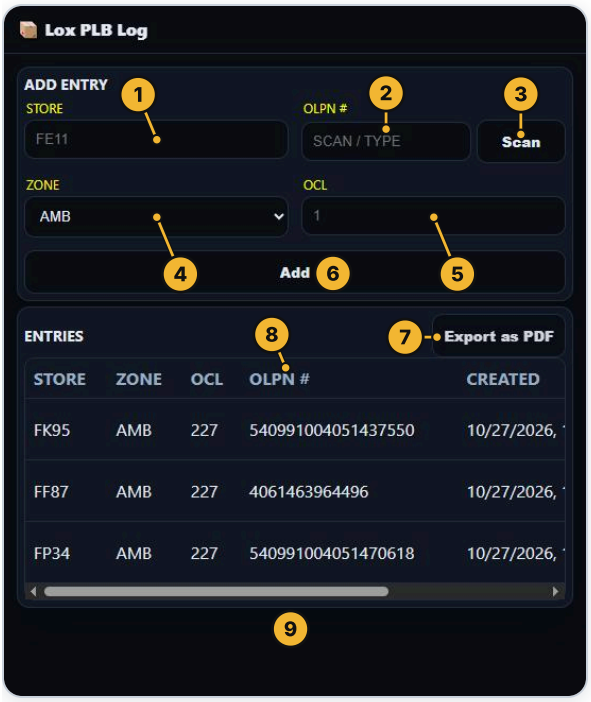

Highlight anything the next shift must not miss, such as carrier requests or runs that must go ASAP. Highlighted notes are yellow.

APP 2 · PLB LOG

Lox PLB Log

OPEN
plblog.loxload.com

Records every **Pallet Left Behind (PLB)**, meaning a pallet that didn't make its store's truck. The list is shared live, so everyone works from the same PLB list.

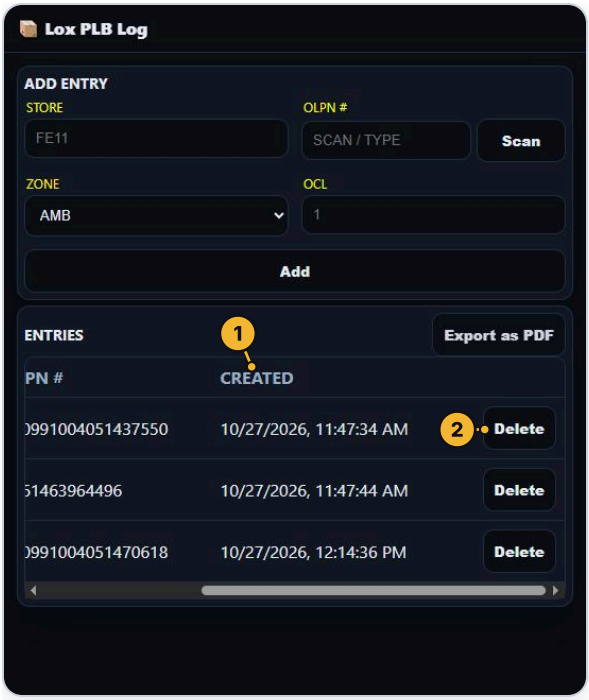

PLB Log: Add entry and the Entries table

1. Store code, for example FE11
2. oLPN #: scan or type the pallet number
3. Scan uses the camera to read the label
4. Zone: AMB, CHL, DP, FRZ or BRD
5. OCL location number
6. Add saves the PLB for everyone
7. Export as PDF for the end-of-shift snapshot
8. Table columns: Store, Zone, OCL, oLPN #, Created
9. Swipe the table sideways to see more columns

Log a PLB

1. Enter the **Store**, then scan or type the **oLPN #**.
2. Pick the **Zone** and enter the **OCL**.
3. Tap **Add**. The entry shows up at the bottom of the table on every device.

PLB Log: the Delete column (swipe the table left)

1. Created: the date and time the PLB was logged
2. Delete removes the entry right away, with no confirmation

CAREFUL

Delete in the PLB Log doesn't ask for confirmation. On a phone, check the row before you tap it.

TIES TO THE WOL CHECKLIST

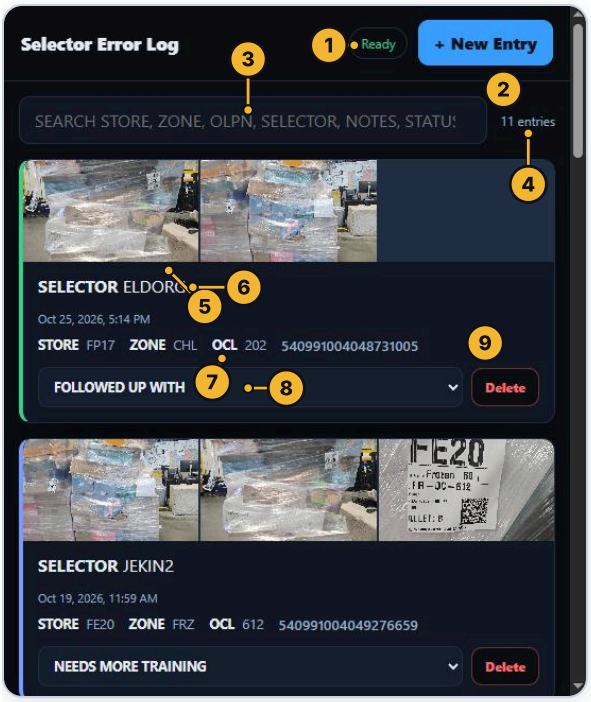

Checklist items #14 and #15 say to update this log, take an end-of-shift snapshot (**Export as PDF**) and record delivery splits.

APP 3 · ERROR LOG

Selector Error Log

OPEN
error.loxload.com
"Lox Pallet Police"

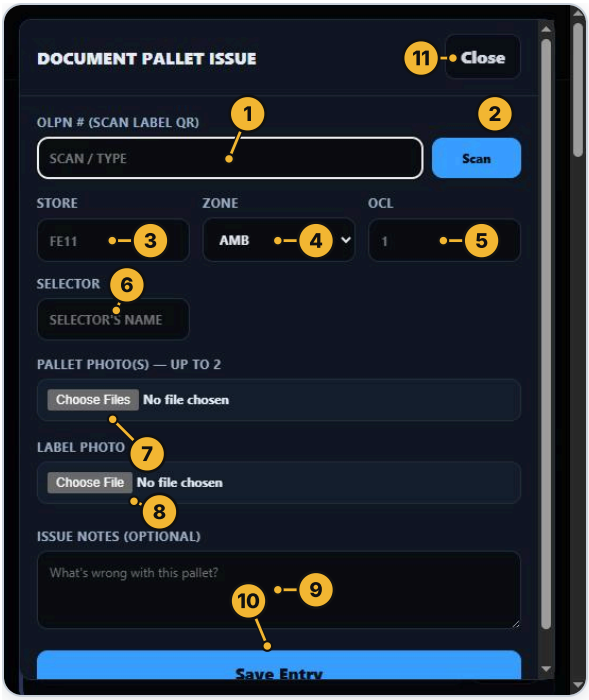

Documents pallets a selector built wrong, with photos, so leads can coach the selector and spot repeat problems.

Error Log: the entry list

1. Live connection status
2. + New Entry opens the pallet issue form
3. Search by store, zone, oLPN, selector, notes or status
4. Total number of entries
5. Pallet and label photos. Tap one to enlarge it
6. Selector who built the pallet
7. Store, zone, OCL and oLPN
8. Follow-up status. The colored left edge matches it
9. Delete asks first, then removes the entry and its photos

STATUS	MEANING
Needs Follow-up	Logged, but nobody has talked to the selector yet
Followed up with	The selector has been coached
Needs more training	Refer the selector for retraining
Repeat Offender	The same type of issue keeps happening

Error Log: Document Pallet Issue form

1. oLPN # (required): scan the label or type it
2. Scan reads the label barcode or QR code with the camera
3. Store (required)
4. Zone (required)
5. OCL (optional)
6. Selector name or user ID (required)
7. Up to 2 pallet photos
8. One label photo
9. Issue notes, for example BOTTOM NOT WRAPPED
10. Save Entry adds it to the log
11. Close without saving

TIP

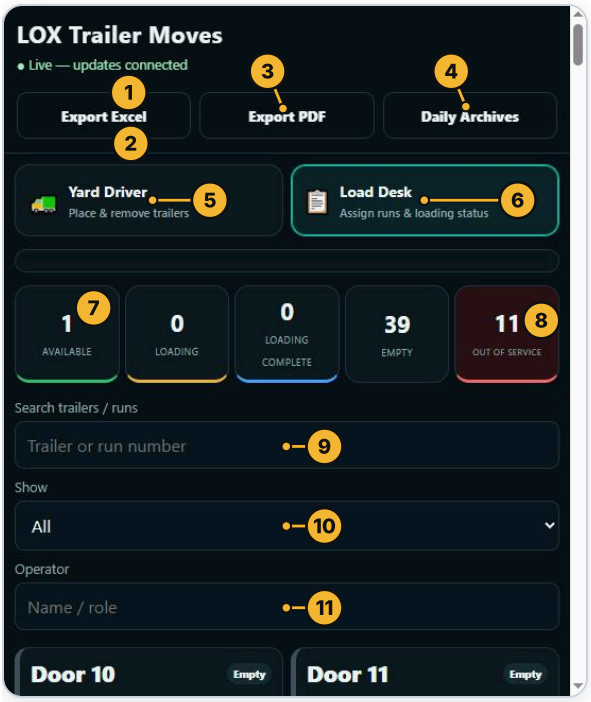

Always take a clear label photo. It proves which pallet it was and who picked it. Search a selector's ID to see their history.

APP 4 · TRAILER MOVES

LOX Trailer Moves

OPEN
yard.loxload.com

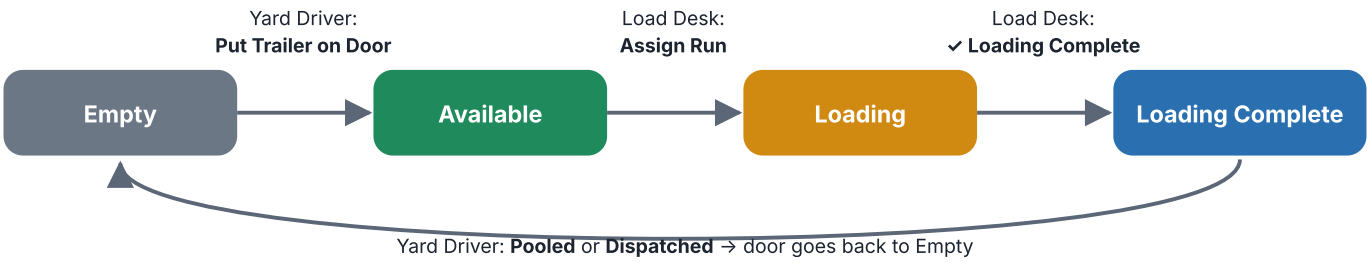

A live board of dock doors **10–49** that the **Yard Driver** and **Load Desk** share. The driver places trailers, the desk assigns runs and marks loading complete, and the driver pools or dispatches finished trailers.

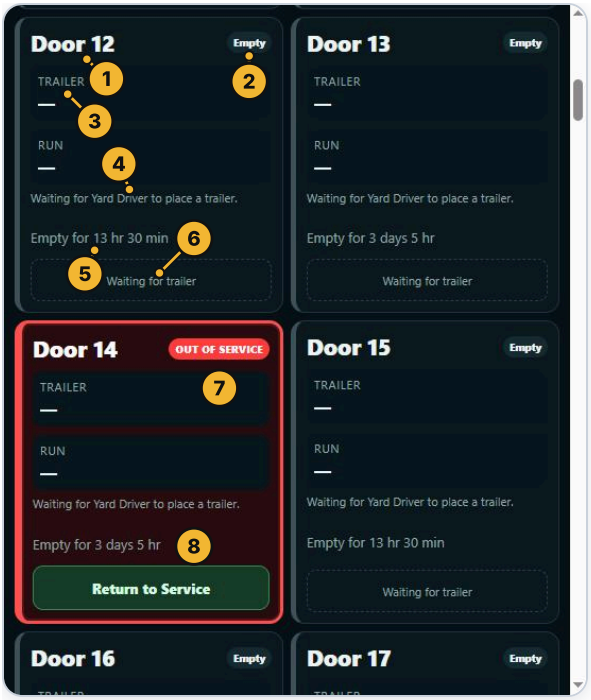

Trailer Moves: top of the board

1. Live connection. Changes pause if this drops
2. Export Excel: today's board and activity
3. Export PDF
4. Daily Archives: Excel saved automatically every night
5. Yard Driver view: place and remove trailers
6. Load Desk view: assign runs and loading status
7. Door counts by status. Tap a view to switch
8. Doors marked out of service
9. Search for a trailer or run number
10. Show only one status
11. Operator: your name, recorded on every action

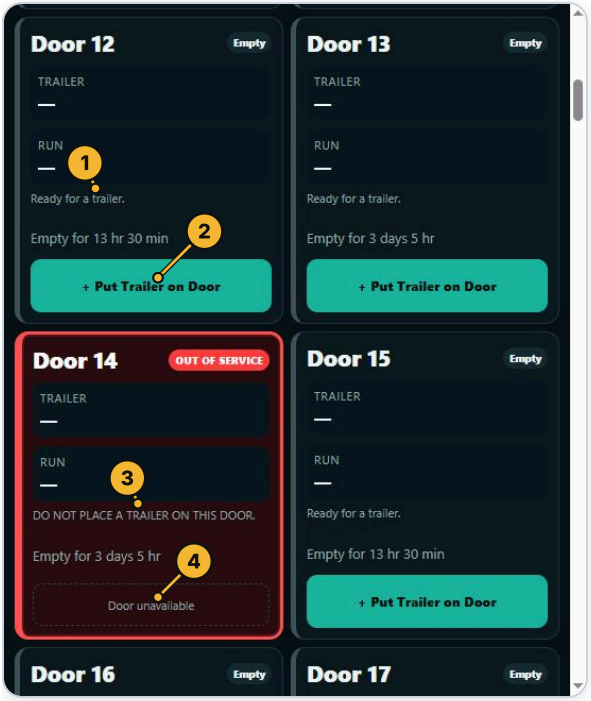

The door life cycle

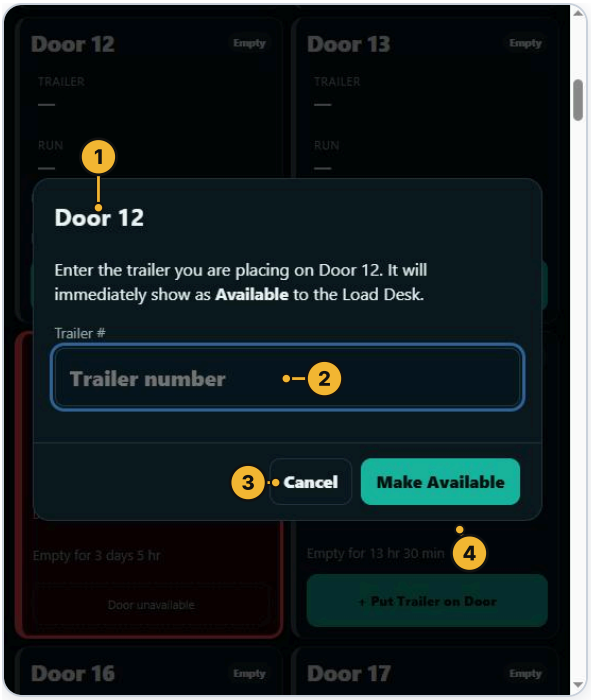

Trailer Moves: door cards in the Load Desk view

1. Door number
2. Current status of the door
3. Trailer and run on the door
4. What the door is waiting for in this view
5. How long the door has been in this status
6. Action area: Assign Run or Loading Complete appear here when the door is ready
7. Out-of-service doors are red
8. Return to Service (Load Desk only)

Trailer Moves: the same doors in the Yard Driver view

1. Instructions change to match the Yard Driver role
2. + Put Trailer on Door: enter the trailer number to make the door Available
3. Out-of-service warning: do not place a trailer here
4. No action is allowed on this door

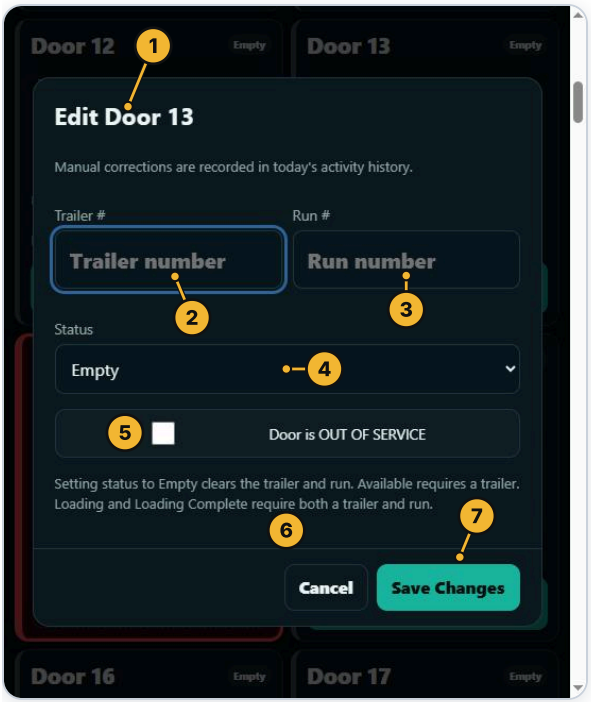

Trailer Moves: placing a trailer (Yard Driver)

1. The door you tapped
2. Type or scan the trailer number
3. Cancel closes without changes
4. Make Available: the Load Desk sees it at once

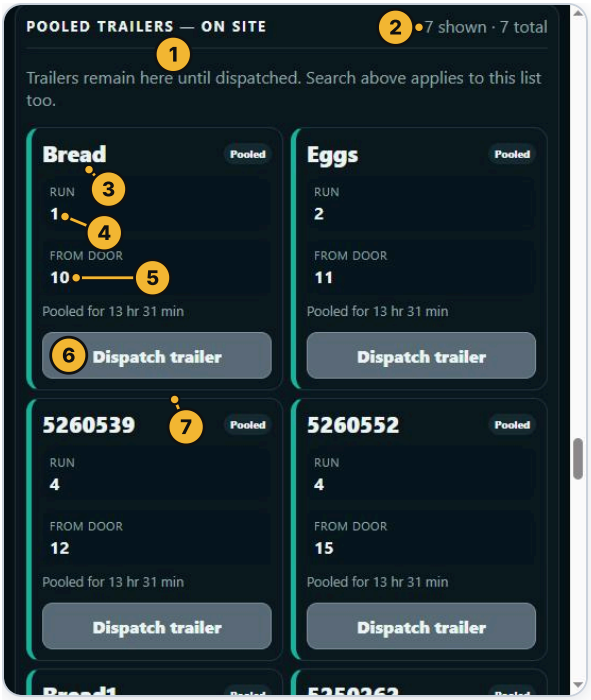

The full sequence

1. **Yard Driver:** tap `+ Put Trailer on Door` on an Empty door, enter the trailer number, and tap `Make Available`.
2. **Load Desk:** Available doors flash in the desk view. Tap `Assign Run`, enter the run number and confirm. The door turns **Loading**.
3. **Load Desk:** when the trailer is loaded, tap `✓ Loading Complete`, then `Complete Loading`.
4. **Yard Driver:** Loading Complete doors flash in the driver view. Tap `Pooled` (parked on the back line) or `Dispatched` (left the yard). The door goes back to Empty.

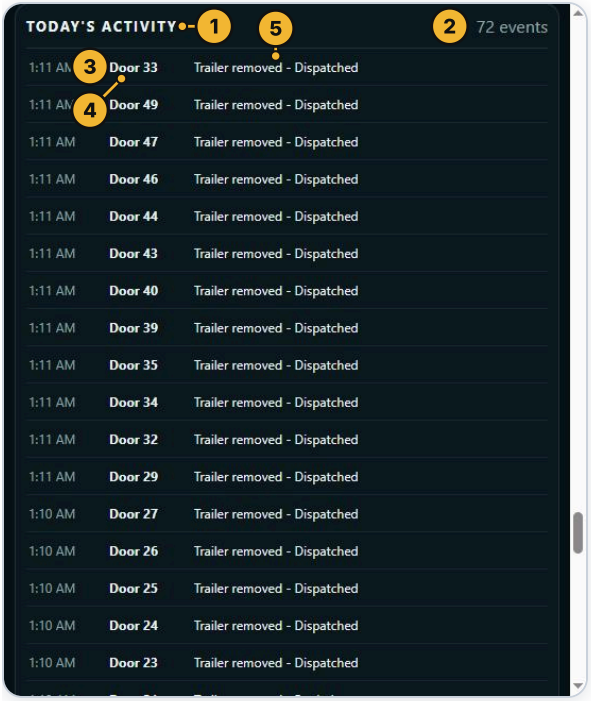

Trailer Moves: Edit Door (double-click, or press and hold on a phone)

1. Edit any door to fix a mistake
2. Correct the trailer number
3. Correct the run number
4. Set the status directly
5. Mark the door OUT OF SERVICE
6. Rules: Empty clears the trailer and run, Available needs a trailer, and Loading needs both a trailer and a run
7. Save Changes. Edits are logged in today's activity

Trailer Moves: pooled trailers waiting on the back line

1. Pooled trailers that are still on site
2. How many are shown and the total
3. Trailer number
4. Run it was loaded for
5. Door it came from
6. How long it has been pooled
7. Dispatch trailer: confirm that it has left the yard

Trailer Moves: Today's Activity log

1. Every move and edit today, newest first
2. Number of events today
3. Time of the action
4. Door
5. What happened, for example Trailer removed - Dispatched

IF A SAVE IS BLOCKED

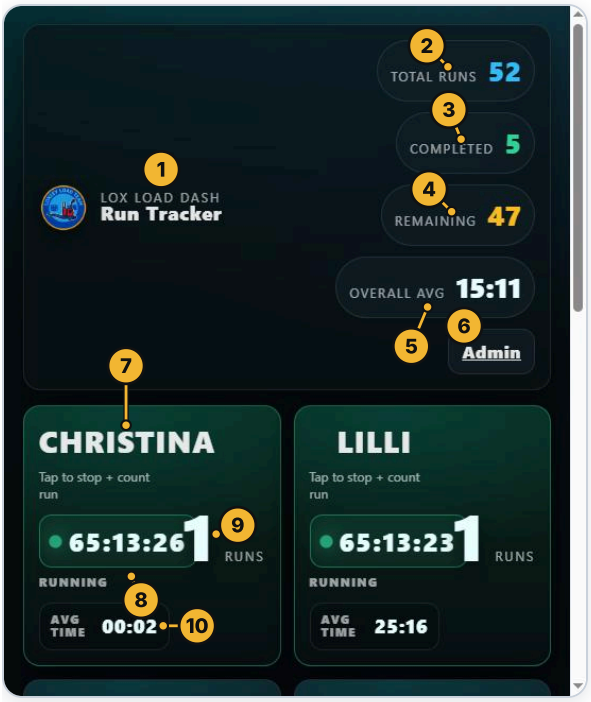

If someone changed the same door just before you, your change is stopped so it doesn't overwrite theirs. Close the window, check the updated card and try again. If the badge says **Changes paused**, wait for the live connection to come back.

APP 5 · LOADER TIMES

Run Tracker

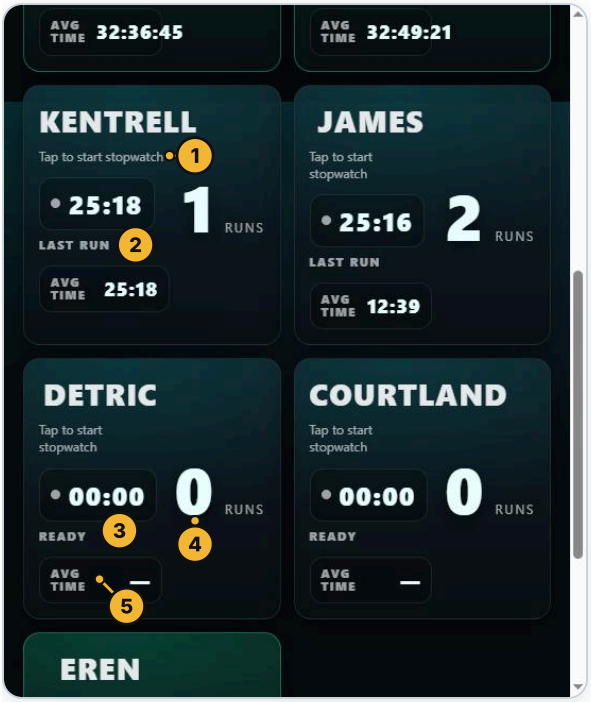

OPEN
tracker.loxload.com
Admin: /admin

A loader scoreboard with a stopwatch on each card. **Tap a card once** to start timing a run, and **tap it again** to stop and count it. A gong sounds and the averages update.

Run Tracker: scoreboard and running loaders

1. Run Tracker scoreboard
2. Total Runs: today's goal, set in Admin
3. Completed runs so far
4. Remaining: Total minus Completed
5. Overall average run time for the team
6. Admin opens the settings page
7. Loader name. Tap the whole card
8. Stopwatch. The green dot means it's running
9. Runs this loader has completed
10. This loader's average run time

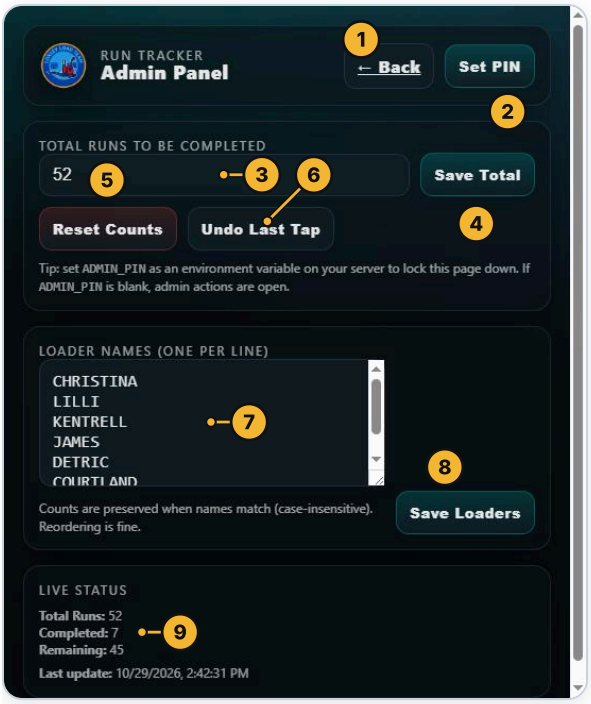

Run Tracker: loader cards that are stopped

1. Tap once to start the stopwatch
2. LAST RUN shows the time of the previous run
3. READY: no run timed yet
4. Runs completed
5. Average time stays blank until the first run

TIP

On iPhone or iPad, tap the screen once before the gong will play. A running stopwatch keeps going across refreshes and devices. If a stopwatch was left running by mistake, use **Undo Last Tap** in Admin.

Run Tracker: Admin Panel

1. Back to the scoreboard
2. Set PIN: enter the admin PIN if one is required
3. Today's total run goal
4. Save Total
5. Reset Counts: set everyone's runs to zero for a new day
6. Undo Last Tap: reverse an accidental tap
7. Loader names, one per line
8. Save Loaders. Counts are kept when a name matches
9. Live status from the server

SECURITY

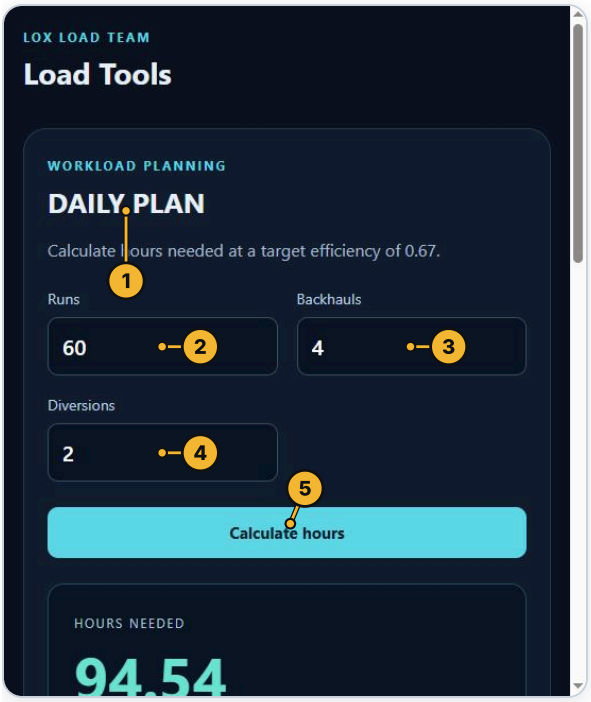

If no `ADMIN_PIN` is set on the server, anyone with the link can reset counts.

APP 6 · EFFICIENCY CALC

Load Tools

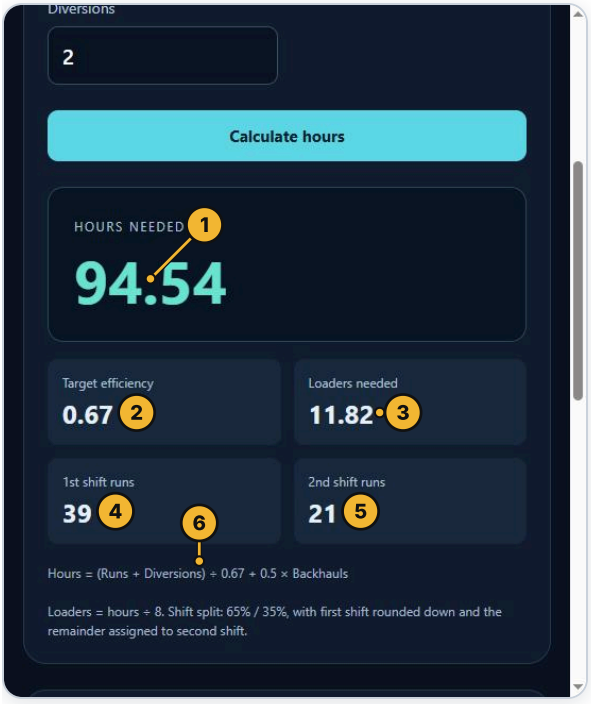

OPEN
ops.loxload.com

Two calculators. **Daily Plan** works out the hours and loaders you need. **Load Efficiency** scores how a shift actually did against the **0.67** target. Nothing is saved. The screenshots use an example of 60 runs, 4 backhauls and 2 diversions.

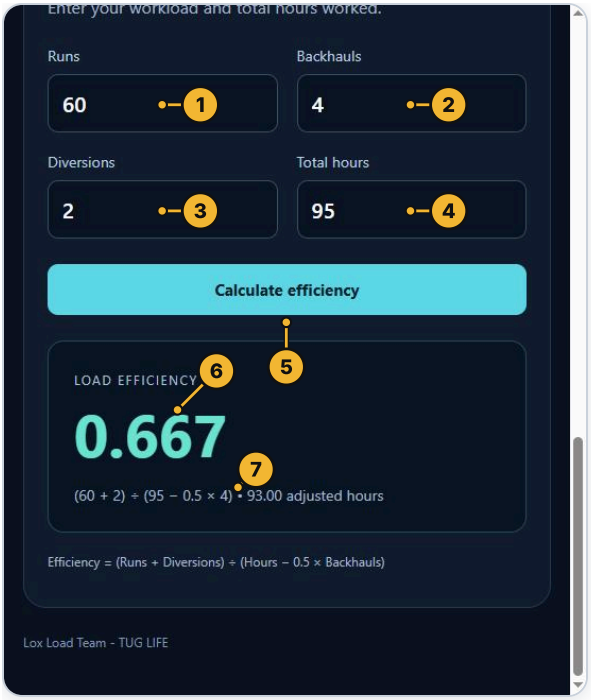

Efficiency Calc: Daily Plan inputs (example: 60 runs, 4 backhauls, 2 diversions)

1. Daily Plan: plan the hours you need before the shift
2. Runs scheduled today
3. Backhauls (each counts as half an hour)
4. Diversions (each counts as a run)
5. Calculate hours

Efficiency Calc: Daily Plan results

1. Hours needed at the 0.67 target
2. Target efficiency
3. Loaders needed (hours divided by 8)
4. 1st shift runs (65%, rounded down)
5. 2nd shift runs (the rest)
6. The formula used

Efficiency Calc: Load Efficiency (example: 95 hours worked)

1. Runs actually loaded
2. Backhauls
3. Diversions
4. Total hours worked
5. Calculate efficiency
6. Result. 0.67 is the target
7. The math, with backhauls removed from the hours

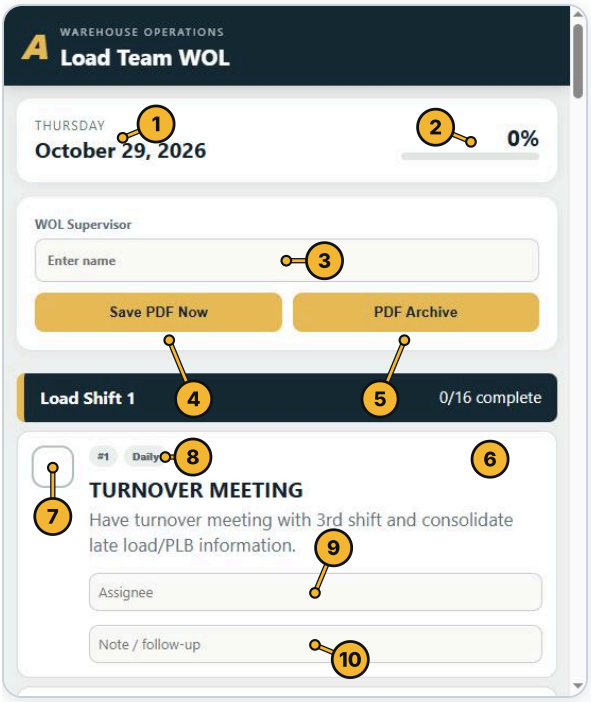

FORMULA	USED FOR
Hours = (Runs + Diversions) ÷ 0.67 + 0.5 × Backhauls	Daily Plan
Loaders = Hours ÷ 8. Split 65% / 35%, with 1st shift rounded down	Daily Plan
Efficiency = (Runs + Diversions) ÷ (Hours − 0.5 × Backhauls)	Load Efficiency

APP 7 · WOL CHECKLIST

Load Team WOL

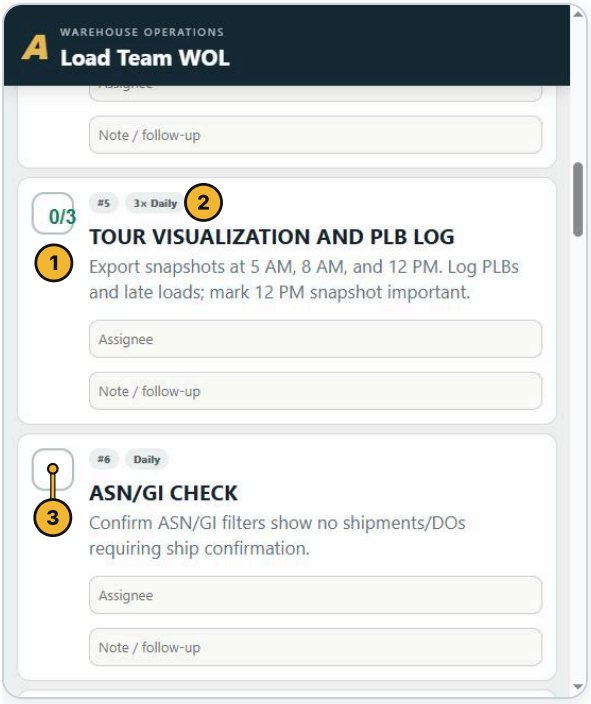

OPEN
checklist.loxload.com

The daily task list: **Load Shift 1** has 16 tasks and **Load Shift 2** has 5. Progress is saved on the server, and the percentage at the top shows how much of the day is done.

WOL Checklist: top of the page and the first task

1. Today's checklist. A new one starts each day
2. Percent of the day's tasks done
3. WOL Supervisor name
4. Save PDF Now: saves today's checklist
5. PDF Archive: past days' PDFs
6. Tasks done in this shift section
7. Tap the box when the task is done
8. Task number and how often it's done
9. Who the task is assigned to
10. Notes and follow-up. Both save automatically

WOL Checklist: tasks that repeat during the day

1. Repeating tasks count up: 1/3, 2/3, 3/3. One more tap resets to 0
2. 3x Daily: snapshots at 5 AM, 8 AM and 12 PM
3. Single tasks show a check mark when done

End of day

1. Go through **Turnover & Outstanding Tasks** with the incoming shift lead.

2. Tap **Save PDF Now**. The day's PDF then appears in **PDF Archive**.

Task list

#	TASK	WHEN	WHAT TO DO
Load Shift 1			
1	Turnover meeting	Daily	Meet with 3rd shift and pull together late load and PLB information.
2	Verify all shipments are closed	Daily	Check that the previous day's shipments are closed. Follow up on loading-in-progress shipments and PLBs.
3	3rd party carrier initial communication	Daily	Collect PLB information, check the PLB process guide, and update the late-load sheet.
4	Cleanout	Daily	Assign cleanouts to loaders.
5	Tour visualization and PLB log	3× Daily	Export snapshots at 5 AM, 8 AM and 12 PM. Log PLBs and late loads, and mark the 12 PM snapshot as important.
6	ASN/GI check	Daily	Confirm the ASN/GI filters show no shipments or DOs that need ship confirmation.
7	Empty trailer availability	Daily	Before the first wave, make sure every available dock door has a trailer.
8	Monitor shipment audit report	Daily	Make a preliminary bay and trailer loading plan, and update ToVI.
9	Eggs/flowers/milk/load-picked items	Daily	Collect and organize oLPNs after the wavemaster runs the waves.
10	Run sheets	Daily	Print run sheets, and attach the matching oLPNs and the load map.
11	OCL maintenance	Daily	Check that OCLs are empty after each load is turned in.
12	Trailers	Hourly	Do trailer checks.
13	Store equipment / shelving	Daily	Get ready any equipment that stores have requested.
14	Pallet left behind log	Daily	Update the PLB log and take an end-of-shift snapshot. Make sure delivery splits are recorded.
15	Close shipments	Daily	Close shipments after loading, and record delivery splits in the PLB log.
16	Eggs/bread	As needed	Keep eggs and bread in active locations, and check deliveries after load hours.
Load Shift 2			
17	Check shipments / errors / unplanned DOs	Daily	Check for WMOS errors, next-day unplanned DOs and blank OBDs.
18	All shipments closed	Daily	Confirm all shipments are closed at the end of the day.

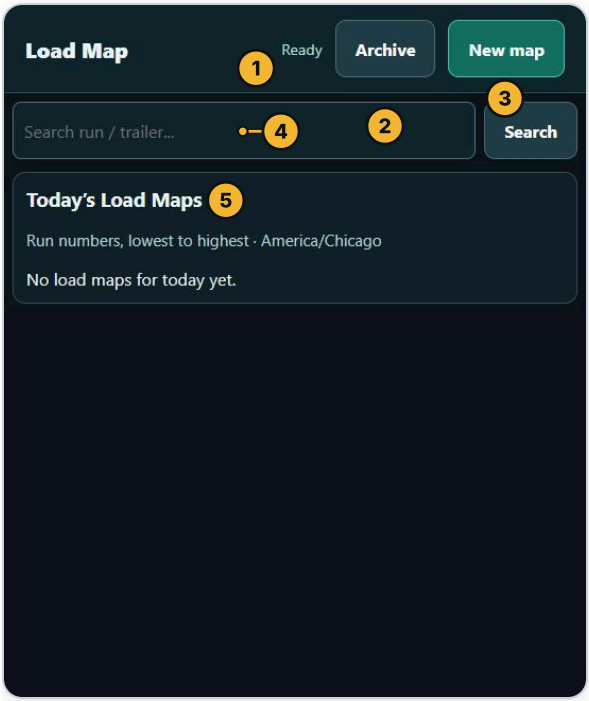

19	Delivery splits shipped	Daily	Use the Delivery Split DOs filter, and check that every PLB sent out is ship-confirmed.
20	All DOs in status shipped	Daily	Confirm all DOs are shipped, close the LOAD WOL, and check the ASN sent status.
21	Non-merch items	Bi-weekly	Take inventory of non-uniform, non-merch supplies.

APP 8 · LOAD MAPS

Load Map TABLET VERSION

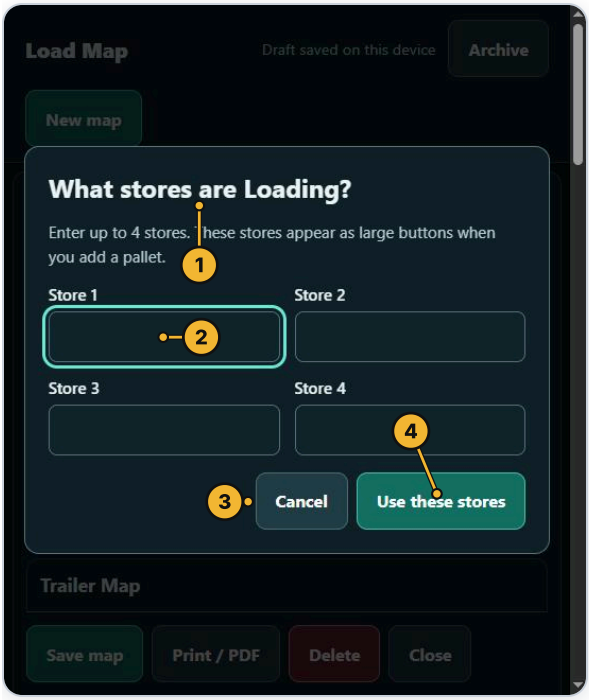

OPEN
loadmap.loxload.com
Archive: /archive

A tablet-friendly map of each trailer. For each of the 30 positions, from the nose to the doors, you tap the position, pick the **store**, then pick **one or two zones**. The app counts the pallets and prints a clean map. The screenshots show an unsaved example map for stores FP34 and FE11.

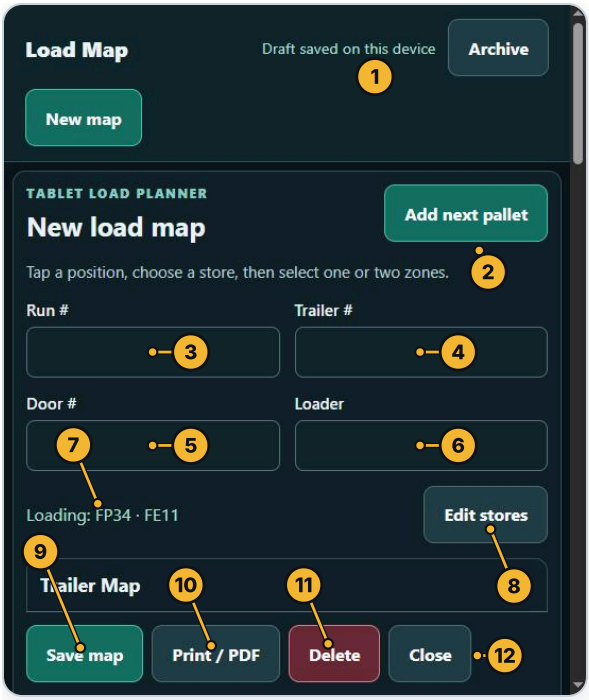

Load Maps: home list

1. Save status, for example Ready or Draft saved on this device
2. Archive: maps from past days
3. New map starts a trailer map
4. Search for a run or trailer
5. Today's maps, sorted by run number

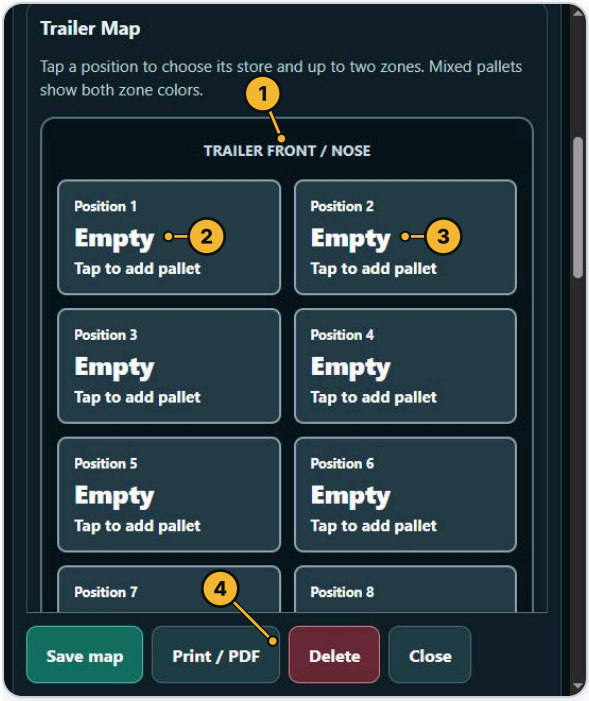

Load Maps: choosing the stores on this trailer

1. Asked each time you start a new map
2. Enter up to 4 store codes
3. Cancel: skip for now and set the stores later
4. Use these stores: they become quick-pick buttons

Load Maps: the map header

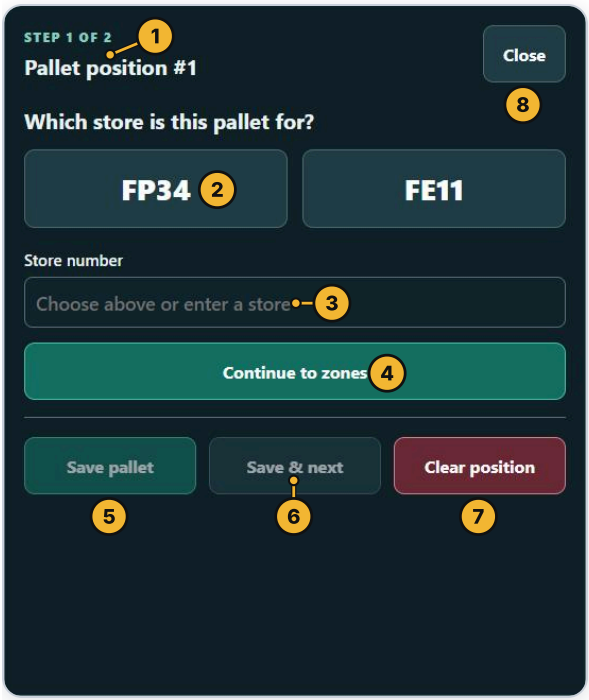

1. Your work is saved on this device as you go
2. Add next pallet: jumps to the next empty position
3. Run #
4. Trailer #
5. Door #
6. Loader name
7. Stores loading on this trailer
8. Edit stores
9. Save map to the server
10. Print / PDF
11. Delete permanently
12. Close and go back to the list

Load Maps: the Trailer Map (30 positions)

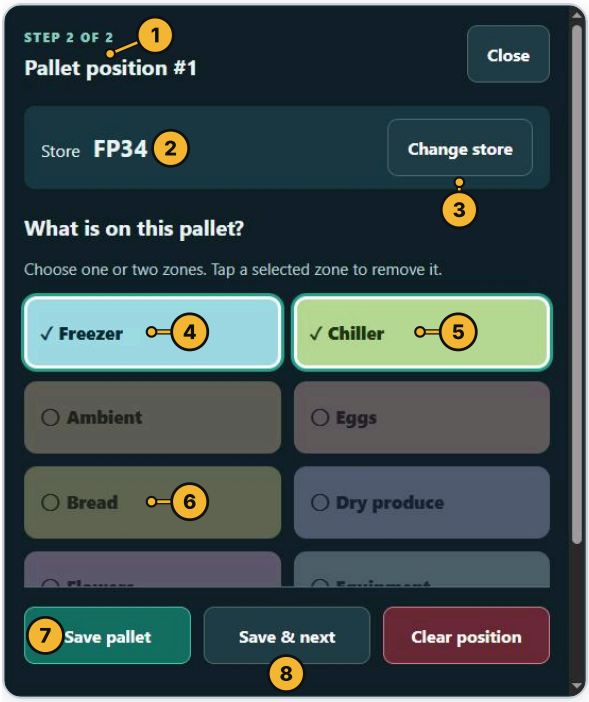

1. The top of the map is the trailer front (nose)
2. Tap any position to add or edit a pallet
3. Positions go in left and right pairs
4. The save buttons stay at the bottom of the screen

Add a pallet in two steps

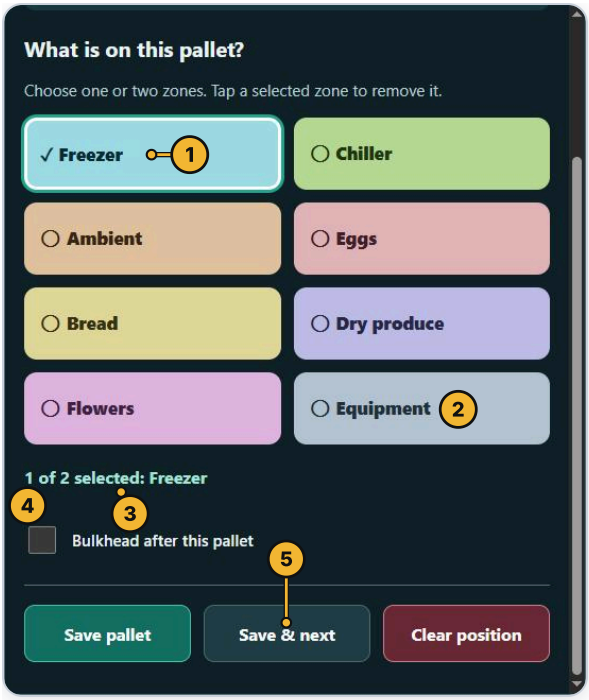

Load Maps: adding a pallet, step 1 (store)

1. Step 1 of 2 for this position
2. Tap a store button. These are the stores you entered
3. Or type a store number
4. Continue to zones
5. Save pallet
6. Save & next: saves it and moves to the next empty position
7. Clear position empties this spot
8. Close without saving

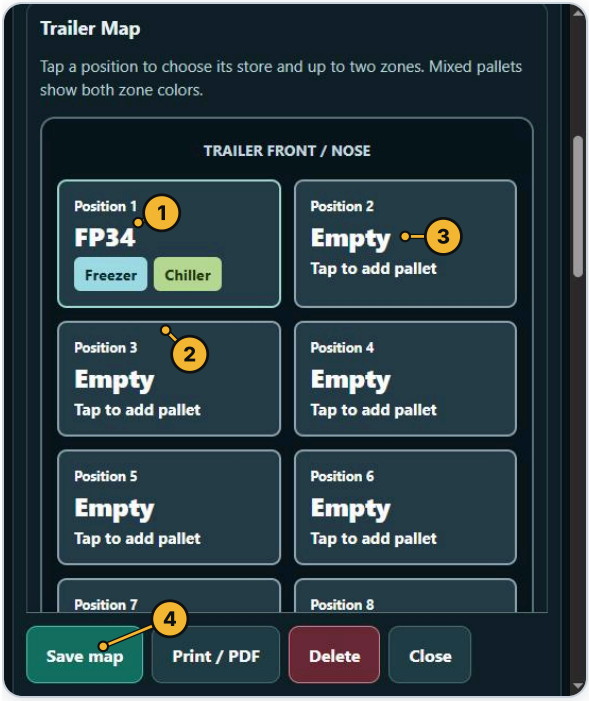

Load Maps: adding a pallet, step 2 (zones)

1. Step 2 of 2
2. The store you chose in step 1
3. Change store goes back to step 1
4. Tap one or two zones. Selected zones get a check mark
5. A mixed pallet can have two zones, for example Freezer and Chiller
6. Other zones: Ambient, Eggs, Bread, Dry produce, Flowers, Equipment
7. Save pallet
8. Save & next

Load Maps: zone colors and the bulkhead option

1. Each zone has its own color on the map
2. All 8 zones: Freezer, Chiller, Ambient, Eggs, Bread, Dry produce, Flowers, Equipment
3. Shows how many zones are selected
4. Bulkhead after this pallet: draws a divider in the trailer
5. Save & next goes straight to the next empty position

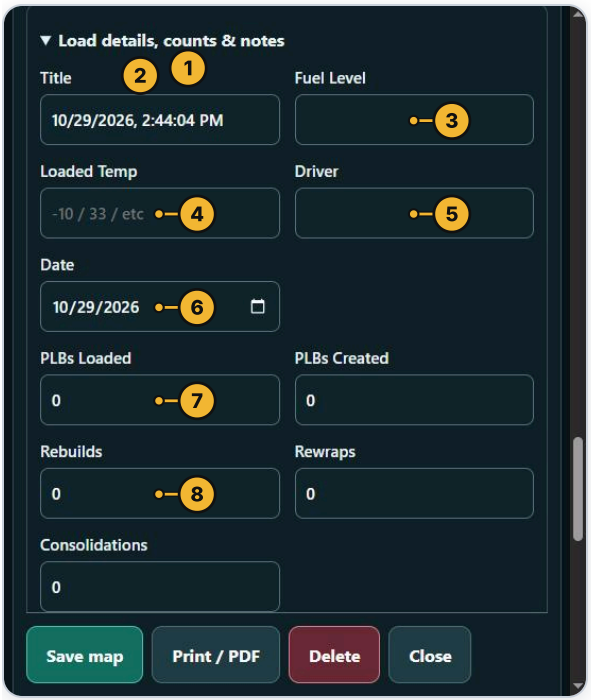

Load Maps: a saved pallet on the map (example)

1. The pallet's store
2. Zone tags. A mixed pallet shows both colors
3. Empty positions still to fill
4. When the trailer is done, tap Save map

FASTEST WAY TO LOAD

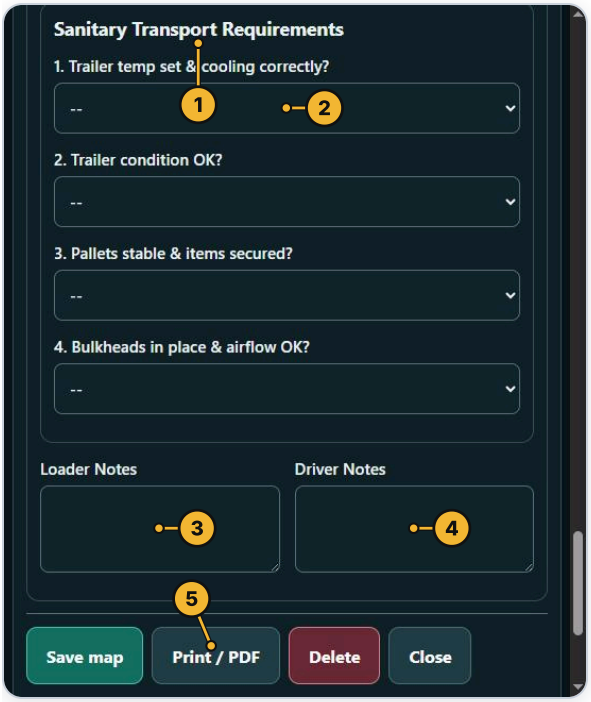

Tap `Add next pallet`, tap the store, tap the zone, then tap `Save & next`. Repeat for each pallet. Use **Bulkhead after this pallet** wherever there's a divider.

Finish the paperwork

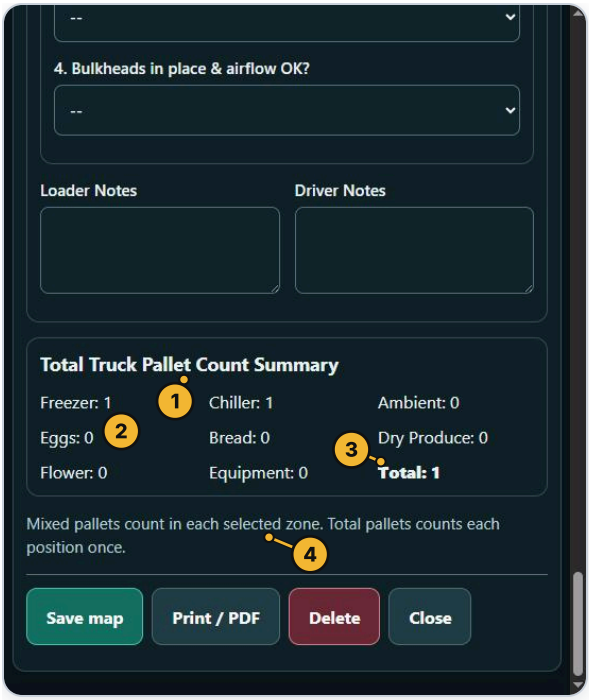

Load Maps: Load details and counts

1. Tap to open or close this section
2. Title is filled in with the date and time. You can change it
3. Fuel level
4. Loaded temperature
5. Driver
6. Date of the load
7. PLBs Loaded and PLBs Created
8. Rebuilds, Rewraps and Consolidations

Load Maps: sanitary checks and notes

1. Answer all 4 sanitary questions
2. Choose Yes or No for each one
3. Loader Notes
4. Driver Notes
5. Print / PDF prints the finished map

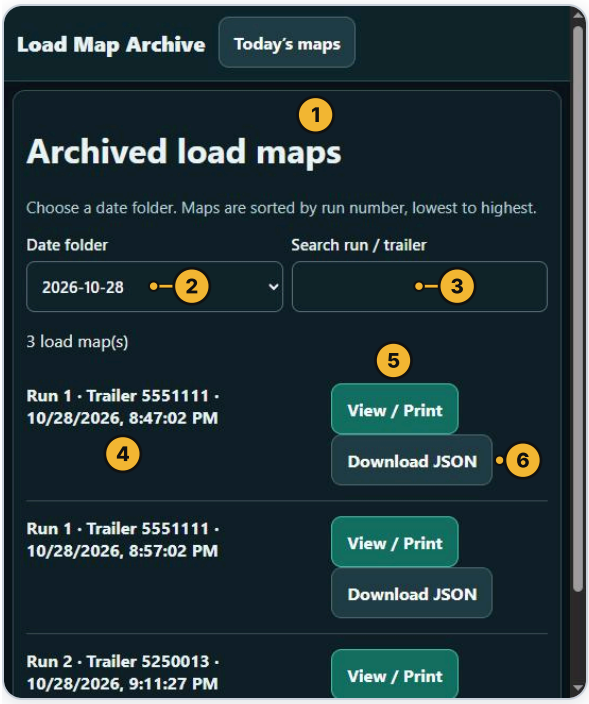

Load Maps: automatic pallet count

1. Totals fill in by themselves as you add pallets
2. Count for each zone
3. Total pallets on the truck
4. A mixed pallet counts once in each of its zones but only once in the total

Save, print and find maps

- **Drafts save themselves** on the device as you work (you'll see "Draft saved on this device"). If the browser closes, reopen Load Maps on the same tablet to pick up where you left off.
- `Save map` sends the map to the server so it appears under Today's Load Maps and in the Archive.

Load Maps: the Archive

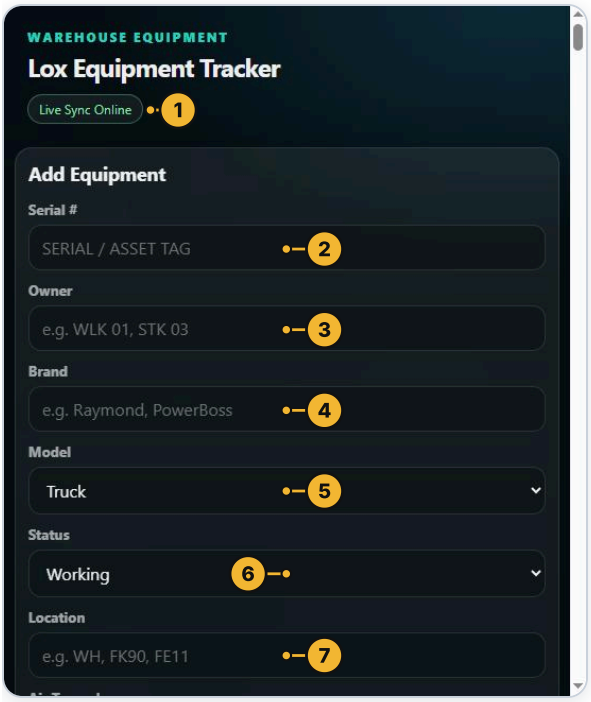

1. Back to today's maps
2. Choose a date folder
3. Search by run or trailer
4. Run, trailer and the time it was saved
5. View / Print the saved map
6. Download JSON for a data copy

APP 9 · EQUIPMENT TRACKER

Lox Equipment Tracker

OPEN
equipment.loxload.com

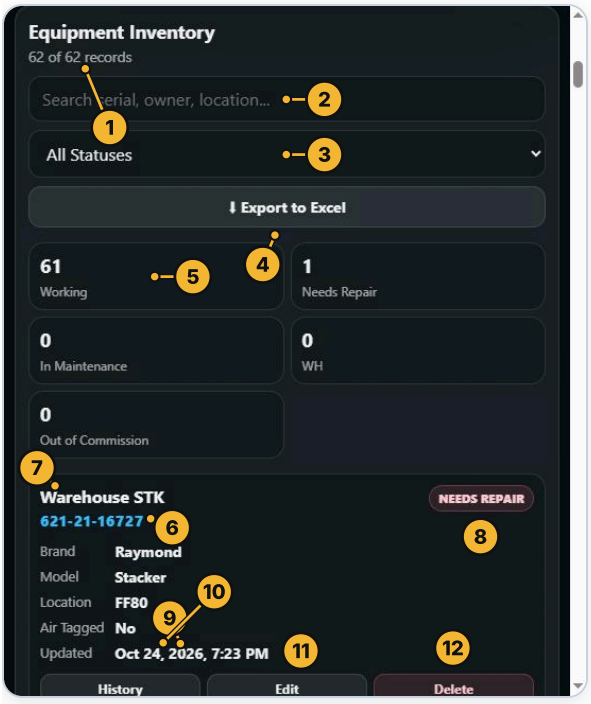

The inventory of warehouse and loaner equipment: walkie trucks, stackers, scrubbers, dock plates and sleds. It tracks where each item is, its condition, and every change made to it.

Equipment Tracker: the Add Equipment form

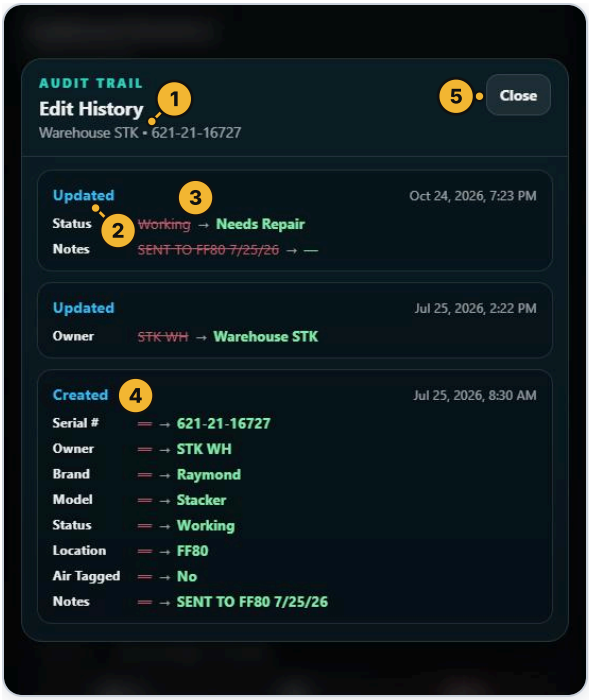

1. Live Sync Online: changes reach everyone
2. Serial # or asset tag (required)
3. Owner or unit name, for example WLK 01
4. Brand
5. Model: Truck, Stacker, Scrubber, Dock Plate or Sled
6. Status
7. Location: WH or a store code

Below the Location field are **Air Tagged** (Yes or No), **Notes** and `Save Equipment`. When you tap Edit on an item, its details load into this form, and `Cancel Edit` appears.

Equipment Tracker: the inventory

1. Records shown out of the total
2. Search by serial, owner or location
3. Filter by status
4. Export the filtered list to Excel
5. Count tiles for each status
6. Owner or unit name
7. Serial number
8. Status badge
9. Brand, model, location, Air Tag and last update
10. History shows every change
11. Edit
12. Delete asks first

Equipment Tracker: History (Audit Trail)

1. The item this history is for
2. The type of change and when it happened
3. The old value is crossed out and the arrow points to the new value
4. Created: the original record
5. Close

STATUS	USE WHEN
Working	The equipment is in service
Needs Repair	It's broken or has a reported problem
In Maintenance	It's being repaired
WH	It's parked or held at the warehouse
Out of Commission	It's retired or can't be used

MOVING EQUIPMENT TO A STORE

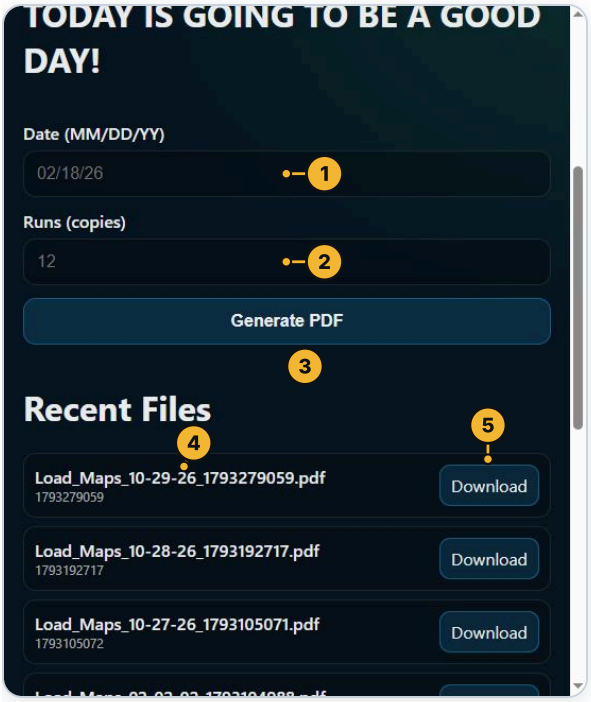

Edit the item, change **Location** to the store code, and add a dated note such as "Sent to FP34 10/29".

APP 10 · PRINTER

Print Load Map Generator

OPEN
print.andytalbert.com

Makes a PDF of **blank paper load map sheets** for the day. Each sheet has the date and its own run number.

Printer: generating blank load map sheets

1. Date as MM/DD/YY. It's printed on every sheet
2. Runs (copies): one numbered sheet per run, up to 300
3. Generate PDF
4. Each PDF is named with its date
5. Download a PDF again to reprint it

CHECK THE DATE
The date is printed exactly as you type it, so check it before you generate the PDF.

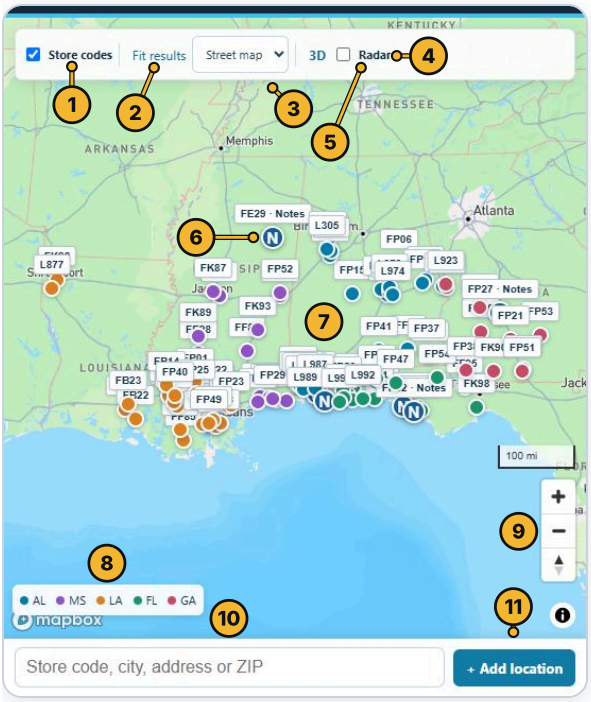

PAPER OR DIGITAL?
The Printer makes blank paper sheets. The Load Maps app (App 8) is the digital version.

APP 11 · STORE MAP

Store Map — Loxley Division

OPEN
map.loxload.com

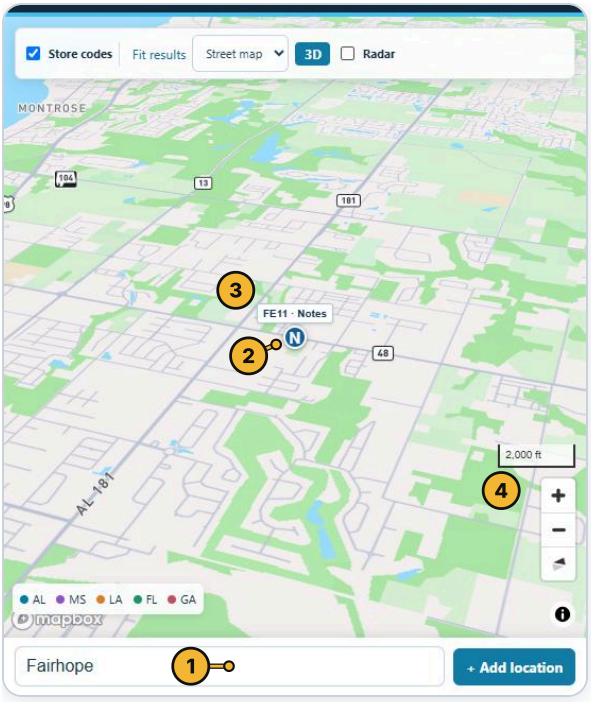

An interactive map of the division's **112 stores** in AL, MS, LA, FL and GA. It has shared delivery notes, flags for stores that can't take a truck, directions and live weather radar.

Store Map: the main map

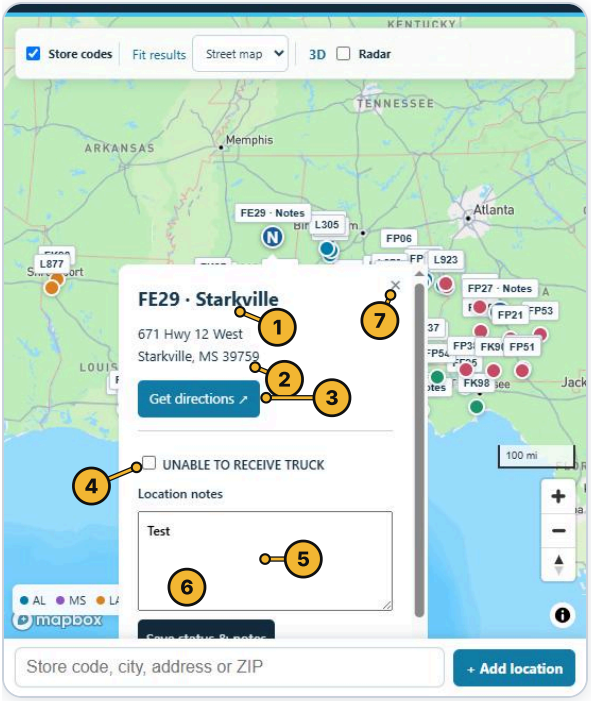

1. Store codes: show or hide the code labels
2. Fit results: zoom to the stores that match
3. Basemap: Street, Dark or Satellite
4. 3D tilts and rotates the view
5. Radar turns on live weather radar
6. N pin: the store has delivery notes
7. Colored dot: a normal store, colored by state
8. State color key
9. Zoom in or out, and the compass to reset north
10. Find a store by code, city, address or ZIP
11. + Add location

PIN	MEANING
Colored dot	A normal store. The color shows the state: AL blue, MS purple, LA orange, FL green, GA rose.
N (blue)	The store has delivery notes
! (red)	UNABLE TO RECEIVE TRUCK

Store Map: searching for a store (example: Fairhope)

1. Type a city, store code, address or ZIP
2. The map zooms to the matching stores
3. The store code label shows Notes when the store has notes
4. The scale bar shows distance

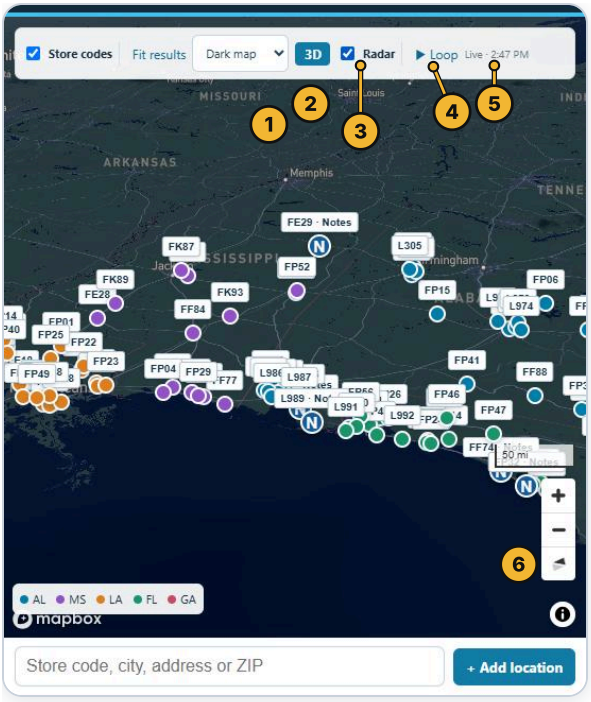

Store Map: tap a pin to see the store's details

1. Store code and city
2. Store address
3. Get directions opens Google Maps
4. Tick UNABLE TO RECEIVE TRUCK to flag the store with a red ! pin
5. Location notes: restrictions, entrance instructions, contacts
6. Save status & notes shares them with everyone
7. Close the popup

NOTES ARE SHARED

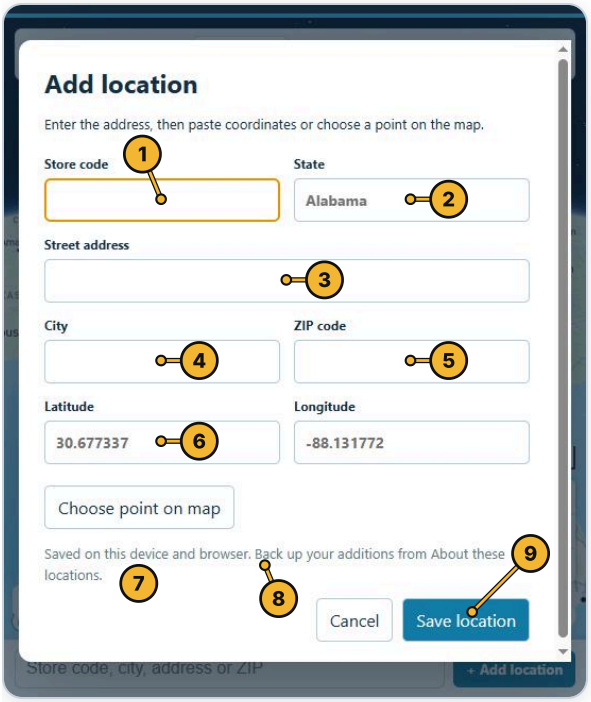

When you see "Saved to server for all users", everyone with the map can see your note. The map checks for updates every 5 seconds.

Store Map: Dark map in 3D, with radar on

1. Dark map selected
2. 3D is on: the map is tilted
3. Radar is on. Clear skies show no color
4. Loop plays the last 50 minutes of radar
5. Radar time: Live, or how old the frame is
6. The compass shows the tilt. Click it to reset north

With a mouse, right-click and drag (or hold Ctrl and drag) to tilt and rotate. On a touch screen, drag up or down with two fingers to tilt, and twist to rotate. Your browser remembers whether radar is on.

Store Map: adding a store location

1. Store code
2. State
3. Street address
4. City
5. ZIP code
6. Latitude and longitude: paste them in...
7. ...or tap Choose point on map
8. Saved only in this browser. Back it up to use it on other devices
9. Save location

Appendix

A typical day with these apps

WHEN	WHAT HAPPENS	APP
Start of 1st shift	Set the WOL assignments, hold the turnover meeting, and enter the supervisor's name	Daily Notes, WOL Checklist
Morning setup	Print blank sheets, plan hours, and set the run total and loader names	Printer, Efficiency Calc, Loader Times (Admin)
Before first wave	Yard Driver puts empty trailers on every open door	Trailer Moves
Loading	The desk assigns runs, loaders tap their cards, and pallets are mapped	Trailer Moves, Loader Times, Load Maps
As it happens	Log PLBs, document selector errors, track equipment moves, check store notes and radar	PLB Log, Error Log, Equipment, Store Map
Loads finish	Mark loading complete, then the Yard Driver pools or dispatches the trailer	Trailer Moves
Shift change	Write handoff notes and go through outstanding tasks	Daily Notes, WOL Checklist
End of day	Export the PLB PDF, save the checklist PDF, check efficiency. The yard archive saves itself at 11:55 PM.	PLB Log, WOL Checklist, Efficiency Calc

Codes and terms

TERM	MEANING
oLPN	The 18-digit pallet ID on the label, sometimes printed with a (00) prefix
PLB	Pallet Left Behind: a pallet that didn't ship on its truck
OCL	The outbound consolidation location the pallet was staged in
WOL	The Load Team's daily lead roles and task list
Pooled / Dispatched	Parked on the back line / left the yard
Bulkhead	A divider in the trailer, marked after a pallet position on the load map
Backhaul / Diversion	A backhaul counts as 0.5 hours in Efficiency Calc. A diversion counts the same as a run.

Troubleshooting

PROBLEM	TRY THIS
The camera scan isn't supported	Use Chrome on Android, or a hardware scanner, or type the number.
Trailer Moves says "Changes paused"	Wait for "Live — updates connected" to come back before you tap anything.
A door change was rejected	Someone updated that door first. Close the window and redo your change.
The Run Tracker gong is silent	Tap the screen once (iOS needs this) and check the device isn't muted.

A load map disappeared when the browser closed	Reopen Load Maps on the same device. Drafts are saved on that device.
A store I added is missing on another device	Added locations live in one browser. Back them up, then restore them on the other device.
